Dear Dave and Potential Customers,

This letter of recommendation is late in coming, but it is one that I promised you and I have no qualms about giving. Perhaps one of the reasons it is late is that we have been enjoying the beautiful patio that you had a big hand in creating for us. We love it. It is a great place to relax during all seasons.

We wanted to expand our small "contractor's slab" patio into something much larger with a cover. The work included several contractors for different aspects of the work, but we are very glad we found you on the internet and talked with you about doing our concrete staining and scoring. You talked with us about what we wanted and what you could offer and helped us select the proper stain color and finish. When the work started we were impressed that you worked as foreman of the crew that did the job. Your attention to detail and protection of the existing home and other's work was excellent. We could easily see firsthand the work being done and how that reflected in the cost. We feel like we got our money's worth for an excellent staining and scoring job.

I will have no problem in recommending you to our friends and family for any future jobs. You may use this letter for that purpose. Of course if they should come by the home to see for themselves they may have to knock extra loud because we may be at the back of the house enjoying your work.

Thank you so much for a job well done!
