

Recently I have had the pleasure of doing business with Decorative Crete-Worx owned by David Gonzales. **Mr. Gonzales was very professional and knowledgeable about his product and the quality materials he would use in resurfacing and staining our concrete floors.** He left us a detailed written estimate of the cost of labor and materials to do the job. Our expectations for our floors were quite different from the average "floor bid" in that the pre-existing slab we wanted work on had gone through extensive damage due to previous foundation work. Not only was Mr. Gonzales confident the he could meet our expectations, he also provided input and ideas on how to do the job. **His input and ideas on handling the project at hand were by far the best solutions for these issues** and were a key factor in awarding Decorative Crete-Worx the bid.

After signing the contract, he proceeded with the job in a very timely and professional manner. He used quality materials and quality construction techniques, **which resulted in an outstanding finished product.** We now have a resurfaced, stained and scored concrete floor that knocks people on their heels whenever they enter our home. **Its very appearance enhances the beauty of our home tremendously.**

I would recommend highly Decorative Crete-Worx to anyone who needs concrete resurfacing or concrete staining. This is a process that should never be left up to a non-professional. **I also recommend Mr. Gonzales, a good and decent businessman who is personable, considerate, kind and sensitive to people and their needs.**

Thank You Mr. Gonzales! Our floors are amazing.
