After getting multiple disappointing estimates from contractors, we contacted Dave at Decorative Crete Worx to come out and look at our concrete entry way to see what he could do, and for how much. Dave was recommended to us by a neighbor, and we are now going to be recommending Dave to anyone who has a similar need! I called Dave on a Wednesday or Thursday, and he was out at our house that very week (on a Saturday, actually, to accommodate our busy schedules). He brought pictures of his prior jobs and had helpful recommendations for our project (we weren't entirely sure what we wanted when we called him, and he steered us in the right direction). Dave's estimate was less than we had received from other contractors, and, unlike the others, he gave us a clear vision for what the finished project would look like. Dave got to work quickly (quicker even than he had estimated), and finished our project in just a couple of days, for exactly the price of his estimate (which we have found is not always the case with contractors).

The finished project is EXACTLY what we were hoping for. His work has given our house a whole new feel when you walk into it. We have used a number of contractors for various projects, and Dave was by far the best to work with. We will absolutely be calling him again for future projects, and recommending him to all our friends and neighbors who need similar work.
