Dave,

We had our fence stained, and as a result we ended up with fence stain pooled all over the concrete retaining wall that was under the fence. After spending days searching for a contractor who could repair the fence stain, we came across Dave. Dave reassured us that all was not lost and our concrete wall was not only fixable but that he could transform it so that it would complement our fence, he sent us pictures showing us examples of this.

During subsequent discussions Dave walked us through all the steps he would perform and told us he would treat our project with the “care and concern he has for his mother.” Once we chose Dave as our contractor, the most challenging aspect was having to wait for an opening on his schedule. Finally after waiting about 8 weeks (due to rain) Dave was able to get our work done.

He literally just left our house and after reviewing the wall it was well worth the wait. If you are looking for a concrete artist, that is professional, conscientious and customizes your project to your needs, then Dave is your guy. We highly recommend him and his team.

Satisfied customer,

Derrick and Tamara Williams
