

November 2005

Dave Gonzales
Decorative Crete-Worx

My wife & I are in the process of remodeling our home. One of the projects was to create a large patio across the back of our home. Our vision was smooth surface concrete, color enhanced and diamond score pattern cut to enhance the appearance.

After due diligence, we selected a contractor and work began on our patio. We expected a smooth finished marbled look. What we got was horrid. The patio was about as smooth as an asphalt road and solid brown. We were devastated. Our contractor attempted to smooth the surface with a grinder and only made it worse and claimed that was all he could do.

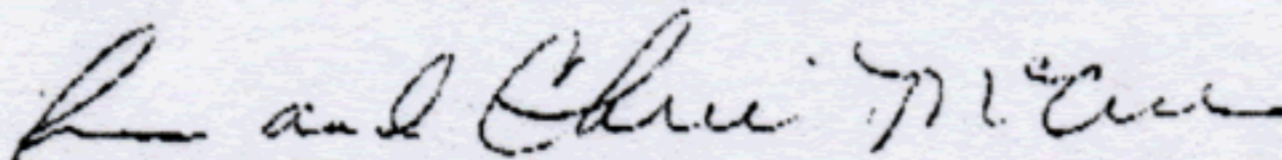

My wife contacted Dave Gonzales at Decorative Crete-Worx and explained our situation. We schedule an appointment hoping he could salvage this mess. He just shock his head and said it was the worst concrete job he had ever seen. We discussed our options but he was not able to guarantee we would ever come close to our original plan.

We made the decision to hire Dave with minimal expectations. The plan was to smooth and micro top the surface, cut the score lines add color and seal the concrete. The result was amazing! It was exactly what we envision at the beginning of our project. We now have a great patio for entertaining instead of the eyesore left by our original contractor.

Throughout the process, Dave worked to satisfy our needs. He was upfront and honest, explained the process thoroughly and completely and most of all delivered. He returned our calls promptly and completed the project on schedule.

Dave is the definition of a professional and I would recommend him and Decorative Crete-Worx to anyone considering concrete work.

Sincerely,

Richard and Chrie McCue
