

[REDACTED]

February 2006

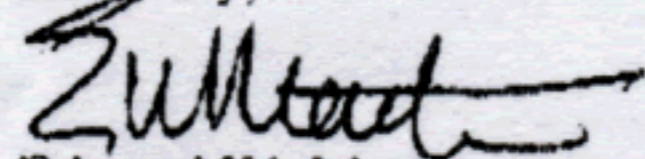

TO WHOM IT MAY CONCERN:

I am happy to provide a recommendation for Dave Gonzalez of Decorative Crete Worx.

Dave installed a micro top surface on our large front porch and the work was very thorough, neat, and completed on time. We had just had a new and expensive patterned concrete walk put in and our front porch needed to reflect the quality of the walk. Dave's work is a very nice compliment to the walk and we have received several compliments from our neighbors.

Following this initial work we were required to have foundation piers installed in four places along the new micro top. This was a blow! However, Dave came back after the foundation work was completed and feathered in a new micro top surface over the areas ruined by the pier installation. We are really unable to tell where they used to be and are again very pleased with Dave's work.

Sincerely,

Edward W. Martin
